**The Sixteenth International Conference on Networks**

<http://www.iaria.org/conferences2017/ICN17.html>

The possibility of offering Infrastructure, Platform, and Software as cloud services made it possible to use of network-attached devices with reduced storage and processing capabilities, enabling them to do all processing on powerful servers.

These devices have a low cost, allowing them to be embedded on televisions, sneakers, watches, home appliance and so on. This diversity of devices has generated a new topic of research called Internet of Things (IoT).

The interaction between Services, Cloud and IoT imposes several challenges. The special track SCIoT aims to bring together researchers with contributions, new directions, and solutions for these challenges.

We invite the authors to contribute with unpublished papers in the following, but not limited to, **topic areas:**

- Services and Cloud Computing
- Internet of Things (IoT)
- Microservices
- Performance Evaluation on SCIoT
- Security on SCIoT
- Optimization on SCIoT
- SCIoT and Big Data
- Service and Microservice Composition
- Fog Computing
- Ubiquitous Computing
