Currently, there is a large amount of data produced by various sectors of modern society that causes data deluge. Such data are collectively called big data. Big data contain data originating both in our physical real world and in social media. If different kinds of data are analyzed in a mutually related fashion or any kind of data are spatially and temporally analyzed, values which cannot be acquired otherwise will be discovered and utilized in various applications ranging from business to science.

Topics to be covered, but not restricted to:

- Concepts and frameworks
- Social data mining
- Scientific data mining
- Spatio-temporal mining
- Internet of Things
- Applications
- Data management
- Application testing
