Special track

ASMSI: Applications of Social Media in Security Informatics

Chair and Coordinator
Assist. Prof. Swati Agarwal, BITS, Pilani, India
swatia@iiitd.ac.in

along with
SOTICS 2017, The Seventh International Conference on Social Media Technologies, Communication, and Informatics
October 8 - 12, 2017 - Athens, Greece
http://www.iaria.org/conferences2017/SOTICS17.html

The new ASMSI track on Applications of Social Media welcomes submissions that make significant and novel contributions to the existing practices by providing effective solutions and actionable insights on evaluation of open source social media data for developing security informatics based applications. Security Informatics is a broad domain and covers a wide range of applications government, security analysts, local civil force, public agencies, and law enforcement agencies. Application of Social Media in Security Informatics is an interdisciplinary area of research and includes the practices used by Computer Science and Security Informatics researchers.

The special track ASMSI welcomes the articles making significant contributions in development, use, and evaluation of advanced information technologies, including methodologies, models and algorithms, systems, and tools, for security and government related applications (public issues, cybercrime, national security, crisis or disaster management, counter-terrorism, racism, politics, etc.). Submissions are encouraged from all the areas of research relevant to SOTICS 2017.

Topics include, but not limited to:

• Frameworks for addressing the issues raised by government and law-enforcement agencies and developing solutions for them.
• Applications of open source social media data (text, images, video, urls) for developing analytical and computational models for solving security informatics based problems.
• Developing solutions, tools, and techniques for analyzing social media data for web-based intelligence applications (visualization, computational, technology advancement, humancomputer interface, prediction analysis, etc.)
• Applications of social network analysis for users and link investigation for computational criminology.

Important Datelines

- Inform the Chair: As soon as you decided to contribute
