Special track

DDTT: How Data Digitalisation is Transforming Transport

Chair and Coordinator

M. Georges Mykoniatis, ENAC Lab, France

georges.mykoniatis@enac.fr

along with

ALLDATA 2018, The Fourth International Conference on Big Data, Small Data, Linked Data and Open Data

April 22, 2018 to April 26, 2018 - Athens, Greece

<http://www.iaria.org/conferences2018/ALLDATA18.html>

In the transportation systems, large information and a large amount of data are used; some are shared, but only few are available. We should notice that we could really improve the way of operating our transports modes by better usage of available data. We should be able to offer to the travelers a better travel experience.

This special track focuses on some of the hot topics associated with the transportation domain and data digitalization, the single ticketing, the issue of interoperability and predictability, and finally, the safety and security aspects.

Prospective authors are invited to submit original papers on topics including, but not limited to:

- Data digitization, as a enabler of the single electronic ticket for all mode of transport
- Interoperability and predictability; the role of the data sharing
- Safety and security: a step forward with the data digitalization
