

Hans-Werner Sehring

Dr. Hans-Werner Sehring is Professor of Software Engineering at Nordakademie gAG.

As such, he lectures in the areas of software engineering, software architecture, and programming.

His research interests include

- ▷ Model-driven software engineering
- ▷ Architectures for evolutionary software systems
- ▷ Knowledge management based on digital media

Hans-Werner holds a doctoral degree from Hamburg University of Technology. He studied computer science at the universities of Passau and Hamburg, Germany.

Prior to his current position, he worked both in academia and in industry.

Between his university assignments, Hans-Werner worked in several consulting agencies. In diverse projects and in many application domains, he filled most software development roles, including solution architect, software architect, advisor on all management levels, product owner, programmer, and project manager.

Hans-Werner has been involved in IARIA activities since he attended the *First International Conference on Creative Content Technologies* (CONTENT 2009). He is member/chair of the conference's steering committee and regularly is on the technical program committee. Hans-Werner delivered keynote speeches and moderated panel discussions on the conferences of the *ComputationWorld* series.

For the IARIA *International Journal on Advances in Intelligent Systems*, Hans-Werner acts as the editor-in-chief.

Hans-Werner became an IARIA fellow in 2012. He will continue supporting and promoting the open-minded work of IARIA.
